att. Mr Brune

Dear Sir:

I am writing you first about the case of Leon Day, one of the employees of the above named baseball club. Mr Day returned to work playing ball last Sunday July 11th, but complained yesterday of discomfort in the injured eye. As a result I asked Dr. Darden to have him taken care of by an eye doctor until he was pronounced well. Dr Darden as a result sent him to Dr Maurice Klinmar, 110 Clinton Ave. Newark. I asked Dr Darden today please to get you all reports on the case at once, and he promised to get the reports out at once. If they are not in your hands now, please call me.

I am also enclosing forms at this time reporting two more accidents. One of them happened four weeks ago, June 20th in Harrisburg. It was not reported to me at the time, and the player involved felt it was not serious enough to think about. In the last few days he has had to have some doctors care, because it has bothered him. I realize it should have been reported at once, but the ballplayers are constantly getting little bruises that they ignore. To date he has lost no time from work as a result of this injury. The mans name is Leon Ruffin.

The other sase of Earl Richardson, he may lose some time, as his fingernail seems to be coming off. I am sure Doctors report will enlighten you on these cases. Please inform me if I am not handling these cases properly.

Very Truly Yours
